

## Paso a paso importación de datos con Wizard:

1. Click derecho en la tabla “Sales” > Click en “Table Data import wizard”.
2. Seleccionar el origen del archivo para el Csv “Sales” y darle click en “Next”:

3. Click en “Use existing table”, validar que sea donde vamos a guardar los datos y luego click en “Next”:

The screenshot shows a 'Table Data Import' window with the title bar 'Table Data Import' and standard window controls. The main heading is 'Select Destination'. Below it, the instruction 'Select destination table and additional options.' is displayed. There are three options: 'Use existing table:' (selected with a radio button and highlighted in yellow), 'Create new table:', and 'Truncate table before import' (unchecked). The 'Use existing table:' option has a dropdown menu showing 'relojes\_colombia.sales'. The 'Create new table:' option has a dropdown showing 'relojes\_colombia' and a text field containing 'Sales'. At the bottom right, there are three buttons: '< Back', 'Next >' (highlighted in yellow), and 'Cancel'.

Table Data Import

Select Destination

Select destination table and additional options.

☒ Use existing table: relojes\_colombia.sales

☐ Create new table: relojes\_colombia . Sales

☐ Truncate table before import

< Back Next > Cancel

#### 4. Validar que las columnas coincidan y click en “Next”:
